

ANT COIN

ECOSYSTEM

ANTC PAPER

INTRODUCTION

Ant coin was the answer to a deep question.

What would happen if a cryptocurrency project was 100% run by its social network?

While the term DeFi literally includes the word decentralized in its definition, this is in reference to economic status as opposed to its internal hierarchy. Our founder, Bruce, said this of our beginnings, "We are an experiment in decentralized social network building (...)"

While none of us could have imagined it at the time, this was the start of a revolution.

Projects built on the foundation of social network involvement are the untamed wilderness of our future. As we move further away from rigid social structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-based projects are more than just a change of pace, they are a way to practice the radical acceptance of others. When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us. The Ant coin Ecosystem is our way of recognizing the importance of tearing down a long-established paradigm of a formulaic success and building a path to freedom and creativity in its place.

A social network is held together by hundreds, if not thousands, of interconnected moments. By studying those drawn to our project, we realized that true power doesn't come from a single perspective, it comes from working together in harmony.

With that thought bright in our minds, we began developing the Ant coin Ecosystem in earnest.

WHY DECENTRALIZATION?

We are standing at a pivotal moment in innovation.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There may have been times in history where this sort of internal configuration played an important role, but, in an age with the information of the world available at the click of a button, its time to rethink.

2021 opened our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock value exploded seemingly overnight. WallStreetBets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike.

It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralized society. However, not before this concept of a new power among the people took root.

Months before any of these events made international news, Bruce was already setting his 100% community-based, cryptocurrency experiment into motion.

Cryptocurrency itself comes from the idea of disrupting routine and redefining how wealth can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within a system of enforceable rules. Its easy to see when we look back at cases like the SEC's win over the Kin Ecosystem (a centralized authority), or when we consider how the Binance Smart Chain seems to use centralized authority to offer "benefits" over their decentralized partnerships.

In the ever-shifting economic landscape, cryptocurrencies which do not take their independence into their own hands struggle with a tenuous existence. When the rules of the game are changed against their favor, they have no option but to comply; regardless of the

consequences.

But not Ant coin.

OUR BACKGROUND

"Let everyone know you." - Franklin

Bruce approached the creation of our social network from a unique perspective.

"We believe through the power of social network we can build something stronger than a centralized team ever could create. A company-run token is nothing without the united individuals who give it purpose."

From the early days of ANTC, we became known as the Ant Army, both within our ranks and across countless other platforms. This wasn't just a nickname. For many, it became part of their identity. Whether you are a new recruit or part of the old guard, if you fly under the ANTC banner, you must embrace our founding principles:

1. We started from zero, with zero. It's the spirit of our project to create something out of nothing.
2. We were not founded from an stranger team, we a ripe team. The brilliant minds behind ANTC had never collaborated before. They were a fresh team of developers, designers, moderators, marketers, and shillers. When you joined the ANTC, from anywhere in the world, you found where your talents could be best used, and got to work.
3. We love Ant coin.

We are proud of where the ANTC Army originated and equally excited for our future. Our founder, Bruce, chose to start ANTC from nothing, and handed the future of the currency over to our army. Starting with nothing means everyone has to bring something to the table. The holders and believers in our ANTC Army have been the source of all our success.

THANK YOU. You are the real ANTC Army, and we salute you!

WHY ETH?

"no pains, no gains" -Franklin

When comparing different blockchains, you might wonder why we chose to stay on the ETH network. The answer, like the rest of our project, is straightforward and purposeful.

Our founder, Bruce, embarked on the ANTC journey with a predisposition towards ETH in the first place. It's already secure and well-established, and it truly allows us to stay decentralized (unlike some of the "fad" networks).

His top priority was to ensure that his project was free to change and evolve with zero outside regulations impacting it, and ETH was the way to achieve that goal. Our army is able to hold their own tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

Our founder also chose to send more than 50% of the total to Vitalik Buterin, Elon Musk, Mark Zuckerberg, Jack Dorsey, Warren E. Buffett wallet because, in his words, "We want to send more than 50% of the supply to well-known figures in the cryptocurrency circle and let them expand the influence of cryptocurrency with us. If there is no weakness, there is no strength. Only unite all the people who can be united, then ANTC will grow and survive."

These aspects of ETH are what made it the perfect foundation for ANTCSwap, a truly decentralized exchange where you can trade, buy, sell, and HODL to gain rewards which far outstrip the value of other staking platforms.

As ETH v.2 gets closer every day, bringing faster and cheaper transactions with it, ANTCSwap is poised to become the most popular and highest volume exchange with a laser focus on ERC-20 tokens and the Ethereum blockchain.

VITALIK BUTERIN, Elon Musk, Mark Zuckerberg, Jack Dorsey, Warren E. Buffett FRIEND OF ANTC

Like Bruce, the creator of Ant, them is visionary. One of the billionaires in history. They are the most influential people in the current society, and we hope to invite them to join us and jointly establish ANTC! .

Its impossible to guess whether or not Bruce knew that exposing us to this "weakness" would actually become our greatest strength. Their total value has exceeded \$2 trillion. If any of them can join us, they will make a great contribution to the long-term development of the blockchain.

The response wasn't entirely positive. Many believed VB had done the right thing from a moral standpoint, but that didn't prevent a wave of FUD from rippling through the cryptosphere. Even after the India transfer, VB still held over 45% of the total ANTC supply, a fact which left investors fearful of potential volatility in the future.

The remaining 50% will be given as a reward to members who actively promote ANTC on the social network. After the official launch of the main network, we will burn the remaining to reduce its liquidity.

The implications for ANTC were incredible. This wasn't done to shave off more zeroes so ANTC could reach higher values in the future, this was a deliberate act which has already changed countless lives.

This is the power of the ANTC Army.

THE VISION OF ANTCSwap

We are dedicated to building the best Decentralized Ecosystem (DECO) on the planet. Our three tokens were the seeds from which the Ant coin Ecosystem sprouted, and ANTCSwap is how they've dug in their roots.

The goal of **ANTCSwap** is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this Ecosystem so it may bring everincreasing interested parties to the ANTCSwap platform.

Our unique tokenomics, solid design, technical implementation, and the viral growth from our good 'ole fashion memes, will reinforce the platform's strength and ultimately provide residual benefits to the Ecosystem.

Making a swap without a budget is a unique challenge, but by tackling various genres and product lines we will build a focused development team from the social network.

We know that with our unified force, and the power of ANTC, we will be successful in advancing the Swap and Ecosystem as a whole, so that we reach new and spectacular heights together.

The best is yet to come!

ANTC ECOSYSTEM TOKENOMICS

"You must understand that there is more than one path to the top of the mountain."

-Franklin

\$ANTC (Ant coin)

ANTC came into this world as a gift in Dec, 2021, and immediately began to change the cryptosphere. Since its launch, the Ant coin project has consistently broken the mold.

- **We will never ICO.**
- **We are committed to creating the first social type of blockchain token.**
- **We are the first blockchain currency to use 50% of tokens for airdrop activities on social networking sites.**
- **We will strive to create a digital currency with the largest number of holders.**

ANTC has been a trendsetter from day one. We were the first to allow diamond hands to hold billions, or even trillions, of our tokens in their wallets, as well as being the first spontaneous social networkbuilding experiment dedicated to a decentralized structure. We earned the nickname DOGECOIN KILLER because the value of SH 10 is primed and ready to overtake the value of Dogecoin. Even if ANTC never hits \$0.01, between our publicity and our utility, ANTC will be worth proportionately more than the popular, canine memecoin.

To become the first social digital currency, we plan to carry out a 100-day token reward event. After 100 days, we will publish a 1:1 number of ANT to your ETH addresses on the main network, all this will be completely free.

ANTC is the first social cryptocurrency token, we will further develop NTF, Meta Universe and ANTCSwap decentralized exchange on the basis of, further immortalizing it in history forever.

HOW TO GET ANTC

Active reward:

- Follow ANTC to get 10,000 tokens per Twitter user.
- Send Twitter posts to get 10,000 tokens/twitter user/day

Please send your tweet link to us in the form of a station letter.

[example message : #ANTC is very interesting! 0x000000000000(your eth address)]

Lucky every day

- We will draw 1 user from the addresses that check in every day, and give away 1 million ANTC

Monthly champion

- We send 100 million ANTC to the address with the most monthly invitees

The event only lasts for 100 days. We will issue ANTC to your account on the mainnet after the event ends. You will only be able to get ANTC by Exchange and Trading Center in the future.

RUFFMAP

Our roadmap will remain top secret to ensure our continued advantage in this highly competitive space.

We will standardize Ant coin products and integrate them into the global marketplace for long term success.

This will look like launching our Incubator and upcoming NFT project, releasing other product, and even potentially actualizing real-world applications that move us beyond the digital landscape.

CONCLUSION

This is the beginning of a new era for decentralized social. When the time is right (because good things can't be rushed), ANTC will be the crucial point of contact between the decentralized world and global social, allowing us to actualize our vision of widespread

adoption of DeFi cryptocurrency.

Again, we would like to say thank you to each and every one of you. Without your participation, none of this would be possible.

Its time for us to begin.

-Bruce

ANTC PAPER (White Paper)

V1

This is a living document and information is up to date at the time of publishing. Please note information herein does not constitute investment advice, financial advice, trading advice, or any other sort of advice and you should not treat any of the content as such.

The Ant coin team suggests you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any Ant coin product, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the products "as is" and is not required to provide any support or services. You should have no expectation of any form from the Ant coin Ecosystem and its team. Although Ant coin is a social networkdriven DeFi Ecosystem and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on Crypto do not purchase it because the team cannot ensure compliance with your territories regulations. Always make sure that you are in compliance with your local laws and regulations before you make any purchase.
